The National Report 2016 is published

The National Report 2016 prepared by the URE experts and sent to the European Commission and ACER in July is now fully accessible in English on the URE website.

The Report presents the most important developments on the Polish energy market in 2015. Readers will find information on both wholesale and retail electricity and gas markets in Poland. The Report describes rules of the energy sector functioning and shows regulator's activities in the field of market regulation, promotion of competition and consumer protection.
